Wednesday, September 16, 2020

Dear Parents/Guardians:

Today we have received confirmation from DHHS of two additional cases, bringing the total to twenty (20) cases identified to date, in our school community. As students recover and receive official approval from NH DHHS of the end of their isolation period, they will be removed from the district’s reported active cases. Our total active COVID case count within the WHS student body is currently five. DHHS is continuing their contact tracing efforts with all individuals who test positive, including new cases. Windham community members that are not WHS students or staff are suppressed in our reported school total.

We will continue to stay united with NH DHHS and our local officials to keep our community updated. You can learn more about COVID-19 in NH by accessing the State of NH COVID-19 webpage at: https://www.nh.gov/covid19/index.htm.

As a reminder, the request to isolate or quarantine at home is not optional and must be followed for the duration provided by NH DHHS. In order to protect and preserve public health, NH DHHS is able to conduct home visits and issue legal orders to ensure home isolation and quarantine requirements are met. If you have clarifying questions about what quarantine or isolation is, you can review the following resource: https://www.nh.gov/covid19/resources-guidance/documents/monitor-health-table.pdf or clarify directly with DHHS by calling 271-4496.

Thank you,

Richard Langlois
Superintendent of Schools
